

**MARINE, OFFSHORE AND NAVAL
OUTFITTING**

THE NEW ALCINAV

ALCINAV SPA is a new chapter of a long history that in more than one century led to some of the most important outfitting works of the Italian Shipbuilding Industry.

It is starting for the "sound" experience of our workmanship joined to the most modern technologies that ALCINAV SPA intends to become the reference supplier for Italian and world shipping market in terms of quality and " on time delivery".

FIELDS OF APPLICATION

- OFFSHORE:** Panel and B15 rated doors, wet Units with high quality industrial level Light Alloy and furniture whenever the weight is a major concern.
- MARINE:** Panels and B15 rated doors, as well as prefabricated wet units with different standards correlated with the requested outfitting level (ferry, passenger vessel, luxury yacht) with high quality standards.
- NAVAL:** Panels and doors, prefabricated wet units as well as light alloy furniture and doors.

Panels and ceilings

Available in different fire ratings and sound reduction levels for all classes of interiors. Multiple connection standards are available to match all installation and standards.

B15 and light alloy Doors

ALCINAV SpA can produce every type of internal door, from B15 fire rated to light alloy ones.

All the doors can be produced with different accessories to cover all Customers requirements and needs.

Wet Units

Can be produced in different dimensions and quality level to match all the requirements of the Marine and Offshore industries.

The accurate design, the materials selection and access solutions grant life time durability and ease of maintenance.

Light Alloy Furniture

Whenever the weight is a major issue both for naval or special marine and Offshore applications the use of our light alloy custom built furniture can become the right solution.

PRODUCTION FACILITIES

In order to grant the always decreasing delivery schedules while keeping our quality standards, ALCINAV SPA, has started a production improvement and plants update.

Aim of such a process is to bring the production of its 4.000 square meters covered plant to 200.000 panels per year.
